A course title is only the beginning.

Post-A/L decisions connect entry rules, prior qualifications and family cash flow.

“Which routes can I explore, and what must I verify?”

The information gap

Eligibility conditions
Complete costs
Trusted progression

A navigator for business, law, health, arts and more.

Start with the student.

Example: a Commerce student exploring accounting after A/Ls.

01 · PROFILE

Choose the field

Business & Finance
A/L and O/L results
Budget and study preferences

02 · EXPLORE

Inspect possible routes

Server checks requirements.
Sources and gaps stay visible.
Real fees remain unknown.

03 · DECIDE WHAT TO ASK

Confirm the next step

Resolve missing information.
Update the profile.
Re-evaluate the whole route.

Results follow the selected field. A programme listing is not a career or admission guarantee.

Jac connects the route. Rules retain the final say.

NATIVE JAC GRAPH

Catalogue → Offering → ProgressesTo

BranchSearchWalker

Isolated qualifications · cycle pruning
Whole-route entry and cash-flow checks

TYPED byLLM DECISION

Search → Evaluate → Ask / Finish

At most four planning actions.
Only supplied fields and route IDs accepted.
Provider failures preserve rule-based planning.

Search bounds: 4 stages · 100 states · 20 paths. Truncation is reported.

Evidence belongs to each claim.

An official programme page confirms a narrower fact than a complete recommendation.

1
sourced application edge

Identity ≠ admission

Fees, intake, recognition and progression have separate sources and statuses.

One supported real route

OUSL English diploma → BA English & ELT

Application route only. No automatic admission or shortened degree is asserted.

Curated discovery sample · Unknown real costs stay null · Claim links appear in the app

Show the calculation. Label the assumptions.

FICTIONAL FINANCIAL ORACLE

Savings LKR 2,000 · Monthly budget LKR 5,000

Route	Total / Initial gap
Direct	**84,000 / 22,000**
Three stages	**54,000 / 0**

LKR · 12-month fixture routes; progression/relocation conditions apply.

4.89 s

one earlier genuine Gemini smoke request

Checks, with clear limits

Native Jac + HTTP regressions passed.
Core browser QA completed.
Final source audit remains pending.

Real affordability is unconfirmed. One live request is not a latency or quality guarantee.

A possible route.
A visible condition.
A better next question.

DEMONSTRATE

Real business discovery → claim sources
